# wildFire preparedness

Almost 45 million homes, 72,000 residential communities, across the US are situated around or in wildland areas which may be exposed to wildfires.

### in and around your home

- Clear leaves and other debris from gutters, eaves, porches and decks. This prevents embers from igniting your home.
- Remove dead vegetation and other items from under your deck or porch and within 10 feet of the house. Learn more about the basics of defensible space on the Firewise website.
- Screen or box-in areas below patios and decks with wire mesh to prevent debris and combustible materials from accumulating.
- Remove flammable materials (firewood stacks, propane tanks) within 30 feet of your home's foundation and outbuildings, including garages and sheds. If it can catch fire, don't let it touch your house, deck or porch.
- Wildfire can spread to treetops. Prune trees so the lowest branches are 6 to 10 feet from the ground.
- Keep your lawn hydrated and maintained. If it is brown, cut it down to reduce fire intensity. Dry grass and shrubs are fuel for wildfire.
- Don't let debris and lawn cuttings linger. Dispose of these items quickly to reduce fuel for fire.
- Inspect shingles or roof tiles. Replace or repair those that are loose or missing to prevent ember penetration.
- Cover exterior attic vents with metal wire mesh no larger than 1/8 inch to prevent sparks from entering the home.
- Enclose under-eave and soffit vents or screens with metal mesh to prevent ember entry.
- Learn more about how to protect your home and property at www.firewise.org.

#### creating an emergency plan

- Assemble an emergency supply kit and place it in a safe spot. Remember to include important documents, medications and personal identification.
- Develop an emergency evacuation plan and practice it with everyone in your home.
- Plan two ways out of your neighborhood and designate a meeting place.
- Learn more about emergency preparedness planning on NFPA's emergency planning webpage.

#### in your community

- Contact your local planning/zoning office to find out if your home is in a high wildfire risk area and if there are specific local or county ordinances you should be following.
- If you are part of a homeowner association, work with them to identify regulations that incorporate proven preparedness landscaping, home design and building material use.
- Talk to your local fire department about how to prepare, when to evacuate and the response you and your neighbors can expect in the event of a wildfire.
- Learn about wildfire risk reduction efforts, including how land management agencies use prescribed fire to manage local landscapes.
- Learn how you can make a positive difference in your community.

## during the time a wildfire is in your area

- Stay aware of the latest news and updates from your local media and fire department. Get your family, home and pets prepared to evacuate.
- Place your emergency supply kit and other valuables in your vehicle.
- Move patio or deck furniture, cushions, door mats and potted plants in wooden containers either indoors or as far away from the home, shed and garage as possible.
- Close and protect your home's openings, including attic and basement doors and vents, windows, garage doors and pet doors to prevent embers from penetrating your home.
- Connect garden hoses and fill any pools, hot tubs, garbage cans, tubs or other large containers with water. Firefighters have been known to use the hoses to put out fires on rooftops.
- Leave as early as possible, before you're told to evacuate. Do not linger once evacuation orders have been given. Promptly leaving your home and neighborhood clears roads for firefighters to get equipment in place to fight the fire and helps ensure residents' safety.

#### after a wildfire has been contained

- Continue to listen to news updates for information about the fire. Return home only when authorities say it is safe.
- Visit FEMA/Ready.gov for more information regarding wildfire after an emergency.

Verdant Underwriting Managers' operations are conducted through multiple legal entities, the choice of which depends on where the entities are authorized to operate. In the UK, Verdant Underwriting Managers is a tradename of Ryan Specialty International Limited (Ryan Specialty International), authorized and regulated by the Financial Conduct Authority (FRN 733324), Registered office: 30 St. Mary Axe, 13th Floor, London, EGA ABBF, United Kingdom. Company number 07164987. In the US, Verdant Underwriting Managers' operations are conducted by Verdant Underwriting Managers, a series of RSG Underwriting Managers, LLC, a Delaware limited liability company (Verdant Underwriting Managers US). Ryan Specialty International and Verdant Underwriting Managers US are subsidiaries of Ryan Specialty, LLC. Verdant Underwriting Managers works directly with brokers, agents and insurance carriers, and as such does not solicit insurance from the public.
